December, 1969.

To the Chairman and Members of the Council,

Lady and Gentlemen,

I have the honour to present the twenty-second Annual Report since the inception of the scheme of Divisional Health administration.

Under the Divisional Health scheme your Medical Officer of Health is also Divisional Medical Officer for the West Riding County Council's local health services and with the amalgamation of the former Todmorden and Brighouse divisions he now has similar functions and responsibilities in the seven other districts in the enlarged division, which includes all the county area served by the Halifax hospitals.

The birth rate in 1968 was 15.0 per thousand which is similar to the figure for the previous year. It is rather higher than usual for Ripponden but remains low when compared to the standards for the rest of the country. The infant mortality rate at 54 was very much higher than usual but these wide variations are to be expected in statistics which are based on small numbers. The death rate was 15.0 per thousand, the principal causes of death being diseases of the heart, cancer and respiratory conditions.

The regulations regarding the notification of infectious diseases were amended during 1968, first when infective jaundice was made notifiable in June, and then in October the Public Health (Infectious Diseases) Regulations, 1968, made some further additions and changes. The most prevalent infection notified was measles, of which there were 10 cases early in the year. An intensive vaccination campaign was started in April, and a total of 1,922 susceptible children were vaccinated in this Health Division.

Once again I am able to report that only one case of tuberculosis was notified during the year. This is a remarkable improvement when one remembers that in the 1950's I was receiving as many as 12 notifications in a year. Many factors have contributed towards this improvement, such as new drugs, the Mass Radiography Service and the availability of hospital beds; but equally important is the higher standard of living now enjoyed by most of the community, and especially the eradication of the worst of our sub-standard houses. The Council has always been most co-operative in allocating houses to cases with medical priority, and this policy has played a significant role in the control and prevention of tuberculosis.

The services provided for old people in the district continue to develop. The County Council has erected a new residential home in the middle of the village and your Council is building a number of old persons dwellings on an adjoining site. These two schemes will provide a much needed service in the village and will enable many old people to continue to live in comfort in familiar surroundings. The Meals on Wheels Service, which is organised by the Old People's Welfare Committee, continues to provide regular hot meals throughout the district and is very much appreciated. The chiropody service, which is now organised by the County Council, continued as before and during the year a total of 81 persons received 317 treatments in the Centre and a further 63 persons who were unable to attend received 205 treatments at home. These figures were similar to those in the previous year.

During the year no action was taken with regard to the clearance of unfit houses but there was an increasing interest in the improvement of older houses which lacked modern amenities. There were 47 applications for improvement grants which represents an increase of almost 100%. Improvements were completed in 22 dwellings. It has always been the policy of the Council to encourage improvements and owners receive every possible help when blocks of property are capable of being brought up to a reasonable standard. There are, unfortunately, a small number of houses where their position or arrangement is such that they do not lend themselves to improvement and a limited clearance programme of such properties is now under consideration.

In conclusion, I wish to thank the Members of the Council for their consideration, patience and co-operation, and to thank Mr. Goulden, Public Health Inspector, for his kindness and efforts to give me the sanitary circumstances of the area, and indeed to all your Officials with whom I made contacts, personal and official.

I am,

Yours faithfully,

N. E. GORDON, M.B., B.Ch., D.P.H.

Medical Officer of Health.

SECTION II.

General Provision of Health Services.

A. Hospitals.

There is no hospital in Ripponden. Patients requiring hospital treatment are referred as a rule to hospitals under the administration of the Halifax Area Hospitals Management Committee (National Health Service). Included in this group are the Halifax General Hospital, Royal Halifax Infirmary, St. John's Hospital (for aged and chronic sick), Northowram Hall Hospital (for infectious diseases), Todmorden Fielden Hospital, and Todmorden Stansfield View Hospital (for mentally subnormal patients).

Maternity beds are available at the Halifax General Hospital. Priority in booking is given to abnormal cases, mothers expecting their first child, and mothers with unsatisfactory home conditions.

Special hospitals (e.g. Mental Hospitals, Orthopaedic Hospitals, Tuberculosis Sanatoria, etc.) outside the Halifax area are available when required ; they are situated in various parts of the so-called "Leeds Hospital Region" which in fact extends into all three Ridings.

B. Ambulance Facilities.

The County Ambulance Service covers the Ripponden district through the Group Control at Birkenshaw and the Divisional Depot at Brighouse and it may be contacted by telephone No. Bradford 682211 or Halifax 62191. There is an agency agreement with Halifax County Borough whereby patients being transferred to and from Halifax Hospitals only are taken in Halifax ambulances, the telephone number of the station being Halifax 60606.

C. Laboratory Facilities.

These are provided by the Public Health Laboratory Service at laboratories in Wakefield and Bradford and by the Regional Blood Transfusion Service at Leeds. There are also facilities for the examination of clinical specimens, including cervical smears, at the Royal Halifax Infirmary.

D. Issue of Anti-toxin, etc.

Supplies of diphtheria and tetanus anti-toxin are available at the Northowram Hall Hospital and at the Royal Halifax Infirmary for issue to medical practitioners requiring them.

By arrangement with the Regional Hospital Board supplies of tetanus anti-toxin are also kept at the Divisional Health Office,

The Medical Centre, Todmorden, for the use of medical practitioners in the Division. A supply of reagents for diphtheria, whooping cough and tetanus immunisation is also available free of charge to private practitioners who have undertaken to participate in the West Riding County Council's schemes of immunisation. Poliomyelitis and measles vaccines are also issued, in accordance with the approved arrangements.

SECTION III

W.R.C.C. PREVENTIVE HEALTH SERVICES.

A. Clinics and Treatment Centres.

The Maternity and Child Welfare Clinic is held at the Zion Congregational Sunday School, Ripponden, every Tuesday afternoon, and is attended by the Health Visitor.

B. Care of Mothers and Young Children.

National Dried Milk, cod liver oil, orange juice, etc., are distributed at the Centre and a variety of brands of dried milk and other infant foods are also sold at the Child Welfare Centre for the convenience of mothers.

Care of Premature Infants.

Special equipment is available for use in the home in cases requiring it. Portable incubators are available at both the Halifax and Brighthouse Ambulance Stations should it be necessary to transfer a premature infant to hospital.

Provision of Maternity Outfits.

These are provided free to mothers preparing for confinement in their own homes.

C. Professional Nursing in the Home.

The West Riding County Council is responsible for both home nursing and midwifery in this area. There is one full-time Home Nurse and one full-time Midwife working in Ripponden and neighbouring parts of the Sowerby Bridge U.D.

Midwifery Service.

Number of home confinements	23

Analgesia.

The Ripponden Midwife is trained in the administration of both trilene and gas and air analgesia and is provided with the necessary equipment. Analgesia is available to all mothers desiring it subject to satisfactory medical examination by a doctor.

D. Health Visitor.

The duties of the Health Visitor are combined with those of School Nurse. In pursuance of the National Health Service Act the scope of this service includes home visiting for the purpose of giving advice as to the care of children, of persons (including adults) suffering from illness, and of expectant and nursing mothers. The Health Visitor also gives advice in the home as to measures necessary to prevent the spread of infection.

E. Home Helps.

In accordance with the National Health Service Act, the County Council provide domestic help for households "where such help is required owing to the presence of any person who is ill, lying-in, an expectant mother, mentally subnormal, aged, or a child not over compulsory school age."

14 cases were attended in Ripponden during 1968 in the following categories: Aged persons, illness and maternity. The total number of hours worked by home helps was 1,945 as compared with 2,079 in 1967.

F. Care and after care.

Special provisions are in operation for the care and after care of patients suffering from tuberculosis, mental illness or sub-normality, venereal disease, and other illness.

Tuberculosis.

A full time tuberculosis health visitor is employed in the division. She attends the chest clinic at the Halifax Royal Infirmary and has helped to forge a valuable link with the hospital services. She is also responsible for visiting patients at home and helps to trace and supervise their contacts. In 1968 visits were paid to 128 households in the division.
